

Comet Player Digital ID Download

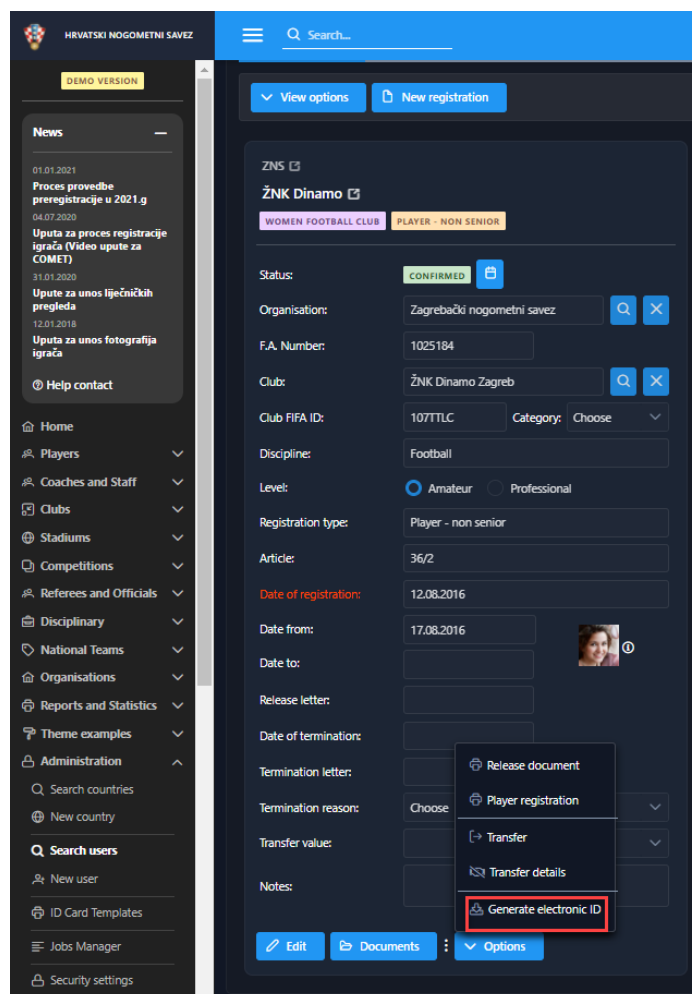

Intro

Comet supports Digital ID for iOS and Android wallets. Clubs will have to generate these per player and send via email or WhatsApp to the players mobile phone.

How To

In order for clubs to download and issue Players Digital ID:

- Select the Player you wish to issue the ID for. You can search for your player in the search menu.
- Select the Options button and Select the Generate electronic ID option

By clicking on the button the system will generate the Digital ID and it will download this to your PC or mobile phone. *Note this file cannot be opened on a PC.*

The downloaded file will then need to be either sent by either email or WhatsApp to the relative player.

On and Apple devices the file can just be added to the players phone wallet directly by clicking the add to wallet button.

On Android devices if you find that you don't have an add to wallet button you may need to download a PK Pass app. These can be found easily on the Play Store by searching PK Pass.

Once added to the wallet you will see a Pass like below (similar to a plane ticket) which **will** be requested on match days. The match referee will be able to scan the QR code and check the players eligibility for the particular match.
